# Stream Sender Quick Start

## Status Lights

- POWER will light **green** when it is turned on.
- STATUS will flash **blue** during normal operation each time data is sent.
- CHARGING will light **orange** while it is charging and turn off when it is fully charged.
- TIP: *Use the Remote Display to view battery life by clicking right on the joystick.*

## Pressure Sensors

- Pressure sensor range: 0 – 100 psi  
- Connect to velocity flow pressure gauge outlet.
- Pressure sensors are labeled 1 to 4 and connect to the corresponding sensor connector.

## Mounting

- Use the included magnetic feet to attach to a metallic object.
- If attaching directly to a diffuser, use the included vibration dampers in between the magnet and mounting tab on the unit.

## Troubleshooting

- STATUS light blinks red slowly at startup – The pressure sensor is not detected. Check your sensor cord for damage.
- STATUS flashes yellow at startup – battery is too low.
